

Enhancing Passive Follow-up

Jill A. MacKinnon, PhD, CTR
2009 FCDS Annual Meeting

Passive Follow-up

- Current
 - Date of last contact
 - VS mortality
- Patient status
 - VS mortality
- Subsequent treatment
 - Not robust

Enhanced Passive Follow-up

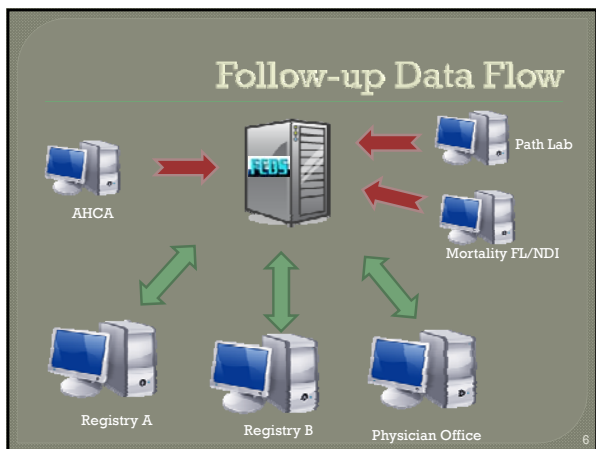

- Pilot project
- Purpose
 - 'Active' date of last contact
 - 'Active' subsequent treatment data
- FCRA/FCDS Task Force
 - Sounding board/Technical advisory group

Data Sources – Phase 1

- ACoS Facilities
 - Submit NAACCR 'M' or 'C' records to FCDS
 - FCDS will harvest the additional data
 - Minimal to no additional burden on facilities
 - *Modification of upload procedure by vendor*
- AHCA discharge data
 - Obtain dates and treatments
 - Compare AHCA data to 'gold standard' (ACoS)

Data Sources – Phase 2

- Physician offices
 - Billing records?
 - Modified abstract?
- Non-ACoS facilities
 - Work with facility specific MIS offices
 - Modify AHCA report to send to FCDS before sending to AHCA

Closing the Circle

FCDS will have 'consolidated' data available

- ACoS facilities download additional F/U information on ad-hoc basis
- Much like the 'mortality data'
- Anonymous data source(s) – FCDS is source
- Physician offices – minimize F/U requests
- ACoS facilities will obtain from FCDS
