

Appendix R

FCDS ADOPTED ICD-O-3.2 in 2018 **NAACCR ADOPTED ICD-O-3.2 in 2020**

Appendix R includes the Histology Code Updates for 2023 and 2024. These latest 2023 and 2024 updates must be used with the 2021 & 2022 Updates from the 2021 & 2022 FCDS DAM.

The WHO is the organization responsible for the structure, format, coding rules and guidelines as well as the anatomical topography (primary site), histology, and behavior codes as published in the *International Classification of Diseases for Oncology*.

The printed ICD-O-3 purple book is very much out of date. However, the Introduction, Basic Instructions, and all Topography Codes are still valid and can be used.

Please use the ICD-O-3.2 Master Histology List, the Solid Tumor Rules (current edition), and the Hematopoietic Database from SEER (online interactive) to correctly assign histology and behavior codes for all cancers. You must not rely on the printed ICD-O-3 manual.

IACR/WHO does provide printed copies of the most recent IACR/WHO Classification of Neoplasms Series. These are available in both printed and subscription at <https://tumourclassification.iarc.who.int/welcome/>.

IACR/WHO began to publish the 5th edition of “Blue Books” in 2020. The 2020-2024 Histology Code Updates from NAACCR and FCDS appear each year in the FCDS DAM and the ICD-O-3 Updates. There is not a single source for these annual updates.

The NAACCR ICD-O Work Group will incorporate new histology codes from the 5th edition WHO Classification of Neoplasms annually as they are published. You may use the unofficial NAACCR ICD-O-3 Annotated Histology Code List for reference at www.naacccr.org/icdo3.
