<div align="center">

Race Coding Instructions
Adopted from SEER Coding and Staging Manual 2025

</div>

Priorities for Coding Multiple Races

List all races for the patient in this priority order.

1. Code **07** takes priority over all other codes
   Example: Patient is described as Japanese and Hawaiian. Code Race 1 as 07 (Native Hawaiian), Race 2 as 05 (Japanese).
2. Codes **02-32, 96-97** take priority over code **01 and 98**
   Example 1: Patient is described as White and Black. Code Race 1 as 02 (Black or African American), Race 2 as 01 (White).
   Example 2: Patient is described as White, Chinese, Korean, Black, and Hawaiian. Code Race 1 as 07 (Native Hawaiian), Race 2 as 04 (Chinese), Race 3 as 08 (Korean), Race 4 as 02 (Black or African American), and Race 5 as 01 (White).
3. Code the specific race before the non-specific race when both a specific race code and a non☐specific race code apply.
   a. When more than five race fields are needed for specific race codes, omit the non-specific race code.
      i. Codes 04-06, and 08-17 take priority over code 96
      ii. Codes 16-17 take priority over code 15
      iii. Codes 20-32 take priority over code 97
      iv. Codes 01-32 and 96-97 take priority over code 98
      v. Code 98 takes priority over code 99

Coding Instructions

1. Do not use patient name as the basis for coding race
   a. See Coding Instruction 14, Exception, for the only situation in which name is taken into account when coding race
2. Code race using the highest priority source available according to the list below (a is the highest and c is the lowest) when race is reported differently by two or more sources. Use self-reported information as first priority.
   a. Self-reported race information takes precedence over genetic testing and over information obtained through linkages. Generally, race information is used from linkages when race data are missing or unknown, or to enhance data. Self-reported information is the highest priority for coding race because the race information for the U.S. population comes from census data and that information is self-reported. For national cancer statistics, in order for the numerator (cancer cases) and the denominator (population) to be comparable, use self-reported race information whenever it is available.
   Sources in Priority Order
   a. The patient's self-declared identification
   b. Documentation in the medical record
   c. Death certificate
3. Assign the same race code(s) for all tumors for one patient
4. Code the race(s) of the patient in data items Race 1, Race 2, Race 3, Race 4, and Race 5
   a. Code **88** for the remaining race data items (Race 2 – Race 5) when at least one race, but fewer than five races, are reported
5. Use the associated text field to document when no race information is available
6. Code as **01** (White) when
   a. The race is described as White or Caucasian regardless of place of birth
   b. There is a statement that the patient is Hispanic or Latino(a) and no further information is available

    i. A person of Spanish origin may be any race; however, for coding race when there is no further information other than "Hispanic" or "Latino(a)," assign race as White as a last resort instead of coding unknown.

    Example: Sabrina Fitzsimmons is a Latina. No further information is available. Code race as 01 (White).

    Note 1: Do not code 98 (Other) in this situation.

    Note 2: Persons of Spanish or Hispanic origin may be of any race, although persons of Mexican, Central American, South American, Puerto Rican, or Cuban origin are usually White.

7. Code race as **02** (Black or African American) when the stated race is African American or Black

8. Assign code **03** for any person stated to be
    a. Native Alaskan (western hemisphere) OR
    b. American Indian, whether from North, Central, South, or Latin America
    Note: Information from IHS linkage can be used to override unknown race. Code 03 can be added based on IHS linkage. Follow the priority rules for recording race above.

9. Code the race based on birthplace information when the race is recorded as Mongolian or Asian and the place of birth is recorded as China, Japan, the Philippines, or another Asian nation
    Example 1: Race is recorded as Asian and the place of birth is recorded as Japan. Code race as 05 (Japanese) because it is more specific than 96.
    Example 2: The person describes himself as an Asian-American born in Laos. Code race as 11 (Laotian) because it is more specific than 96.

10. Use the appropriate non-specific code 96 (Other Asian including Asian, NOS), 97 (Pacific Islander, NOS), or 98 (Some other race) when there is no race code for a specific race
    Note: Document the specified race in a text field.

11. Do not use code 98 alone for "multi-racial." If multi-racial is the only information available, assign code 99. See Coding Examples below.

12. All race data items must be coded 99 (Unknown by patient) when Race 1 is coded 99 (Unknown by patient)
    Note: Assign code 99 in Race 2 –Race 5 **only when** Race 1 is coded 99.

13. Assign code 99 for death certificate only (DCO) cases when race is unknown

14. Refer to the "Race and Nationality Descriptions" when race is unknown or not stated in the medical record and birthplace is recorded
    a. In some cases, race may be inferred from the nationality. Use Appendix D to identify nationalities from which race codes may be inferred.
    Example 1: Record states: "this native of Portugal..." Code race as 01 (White) per Appendix D.
    Example 2: Record states: "this patient was Nigerian..." Code race as 02 (Black or African American) per Appendix D.
    Exception: Code Race 1 through Race 5 as 99 (Unknown by patient) when patient's name is incongruous with the race inferred on the basis of nationality.
        Example 1: Patient's birthplace is listed as England. Patient's name is Siddhartha Rao. Do not use country of birth to code the patient as White. Use other information to code the race. If no additional information is available, code Race 1 through Race 5 as 99 (Unknown).
        Example 2: Patient's birthplace is Ethiopia. Patient's name is Ping Chen. Do not use country of birth to code the patient as Black. Use other information to code the race. If no additional information is available, code Race 1 through Race 5 as 99 (Unknown).

15. When the patient face-sheet indicates "Race Other," look for other descriptions of the patient's race. When **no further race information is available, code race as 99 (Unknown by patient)** and document that patient face-sheet indicates "Race Other," and no further race information is available.

16. Do not use patient photographs or images from social media to code race

17. Code the race data items in the order stated when no other priority applies

18. The race of parents, when known, may be used with caution to determine patient's race in the absence of other more specific information (see coding examples 5 and 7)

Coding Examples

Example 1: Patient is stated to be Japanese. Code as 05 (Japanese).

Example 2: Patient is stated to be German-Irish. Code as 01 (White).

Example 3: Patient is described as Arabian. Code as 01 (White).

Example 4: Patient described as a black female. Code as 02 (Black or African American).

Example 5: Patient states she has a Polynesian mother and Tahitian father. Code Race 1 as 25 (Polynesian), Race 2 as 26 (Tahitian) and Race 3 through Race 5 as 88.

Example 6: Patient describes herself as multi-racial (nothing more specific) and nursing notes say "African☐American." Code Race 1 as 02 (Black or African American). Code Race 2 as 98 (Some other race). Code Race 3 through Race 5 as 88.

Example 7: The patient is described as Asian-American with Korean parents. Code race as 08 (Korean) because it is more specific than 96 (Asian) [-American].

Example 8: Race 1 through Race 5 in the cancer record are coded as 99 (Unknown by patient). The death certificate states race as black. Change cancer record for Race 1 to 02 (Black or African American) and Race 2 through Race 5 to 88.

Example 9: Race 1 is coded in the cancer record as 96 (Asian). Death certificate gives birthplace as China. Change Race 1 in the cancer record to 04 (Chinese) and code Race 2 through Race 5 as 88.

Example 10: Patient is stated to be Chinese and black. Code Race 1 as 04 (Chinese), code Race 2 as 02 (Black or African American). Code in the order stated when no other priority applies.

Example 11: Patient described as Middle Eastern. Code as 01 (White).

Example 12: Patient described as Greek. Code as 01 (White).

Example 13: Race 1 is coded by one facility as 02 (Black or African American) and Race 1 is coded by a different facility as 03 (American Indian or Alaska Native); no further documentation is provided. When consolidating records at the central cancer registry, code Race 1 as 02 (Black or African American) and Race 2 as 03 (American Indian or Alaska Native). If the patient is identified as Native American via the IHS linkage, follow usual procedures.

Example 14: Patient is from Guyana. Patient's race is coded differently in multiple source records using codes such as 02 (Black or African American) for Race 1 or 98 (Some other race) or 15 (Asian Indian, NOS or Pakistani, NOS), for example; no further documentation is provided. When consolidating records at the central cancer registry, record all races reported in the appropriate priority order.

Example 15: Electronic medical record indicates patient is "Native Hawaiian or Other Pacific Islander." Look for other descriptions of the patient's race. When no other information is available, assign 07, Native Hawaiian, in Race 1 and assign 97, Pacific Islander, NOS in Race 2.

Example 16: Patient is "Belgian." Medical record indicates "non-Hispanic, other race." Patient appears white on scanned driver's license photo. Assign race code 01 for white. "Belgium" is classified as "European" in Appendix D and European is included under the descriptions for white. Do not use photo to verify race.

RACE AND NATIONALITY DESCRIPTIONS
FROM THE 2000 CENSUS AND BUREAU OF VITAL STATISTICS
Note: Use these lists only when race is not stated but other information is provided in the medical record.
