In order to calculate the rates comparable* to those on the FCDS website you must include the following parameters:

- (SEER Summary Stage 2000 between 1 and 9 for diagnosis years ≥ 2001) or
(SEER Summary Stage 1977 between 1 and 9 for diagnosis years < 2001) or
FCDS Site group = 55

***The counts will never match exactly as the information contained on this CD is the latest information available and the rates are calculated from a static database that is never reclosed or updated. If your counts and frequencies match those in the frequencies tables included then you have read the data in correctly.**
