The data set is a comma delimited file.

If the column codes is marked with an “X” then the codes are listed below. If the column codes contains an F then refer to the [FCDS Data Acquisition Manual](#) – use the NAACCR Item number to look up the variable its corresponding codes. F and X with asterisk denote variables with additional information/explanation provided in this document.

Although the codes are nearly identical for SEER Summary Stage 1977 and 2000 and Summary Stage 2018; the methodology for coding these variables is distinct. Please refer to SEER Staging Manuals SEER Summary Staging Guide and the SEER Summary Staging Manual 2000 and/or Summary Stage 2018.

Please note over the last two decades staging rules have changed much too often; not only from direct coded to derived; but also during the derived years, the Collaborative staging algorithm changed several versions. Use caution when analyzing diagnosis stage over time.

In order to make it easier for researchers, FCDS has made the following changes to SEER Summary Stage 2000 and SEER Summary Stage 1977 variables.

DX Years	SEER Summary Stage 1977 NAACCR Item 760	SEER Summary Stage 2000 NAACCR Item 759	Summary Stage 2018 NAACCR Item 764
1981-2000	Direct coded or Derived*		
2001-2003		Direct coded or Derived*	
2004-2015		Derived*	
2016-2017		Direct coded*	
2018+			Direct Coded*

Direct coded signifies that the stage was abstracted from the medical record.

Derived signifies that the stage was derived using a computer algorithm.

Variables Derived SS1977 Flag and/or Derived SS2000 Flag denote whether the stage variable was derived or direct coded.

In order to calculate the rates comparable to those on the FCDS website you must include the following parameters:

- **(SEER Summary Stage 1977 between 1 and 9 for diagnosis years ≤ 2000) or
(SEER Summary Stage 2000 between 1 and 9 for $2001 \leq$ diagnosis years ≤ 2017) or
(Summary Stage 2018 between 1 and 9 for diagnosis years ≥ 2018) or
FCDS Site group = 55**
