**Notes:**

<sup>1</sup> Stat Dataset is available free of charge; however the variables are fixed. No additional variables can be added to the list. If you need additional variables you will need to apply for ad hoc. Please review carefully the Stat dataset layout for additional information

**Variables shaded in light green** Most likely will require approval from the Florida Department of Health (DOH) Cancer Registry Program and DOH Institutional Review Board. Please see "Procedure Guide for studies that utilize FCDS for patient identifiable data". All other variables may or may not require DOH IRB approval, as determined by the Florida Department of Health Cancer Registry Program.

**Variables shaded in pink** Will require additional approvals from the Florida Office of Vital Statistics.

3 separate and distinct entities and their respective roles in data release.

- 1) **Florida Cancer Data System (FCDS)** maintains and collects the data. And performs data extracts after approvals are obtained from Florida DOH Cancer Registry Program and if required from Florida DOH IRB.
- 2) **Florida DOH Cancer Registry Program** decides what variables will or will not be released based on scientific merit and if variables are available that will meet the research needs of proposed research. Florida DOH Cancer Registry program will also decide whether or not the application will require Florida DOH IRB approval.
- 3) **Florida DOH IRB** reviews data applications to ensure it is ethical, and that participants are protected.
